

 **IMITATION MARKET**

WHITEPAPER

VERSION 1.0 / DECEMBER 2021

IMITATION MARKET

IMITATION MARKET

Imitation Market; It is an NFT market located in Opensea's NFT marketplace. Imitation Market brings to the market the best quality, unique imitations of popular and high-priced NFT collections with the NFT series. Class A imitations appear as a reflection of the originals. The series of Imitation Market is a live series that develops and grows according to the NFT market.

We design imitation NFTs as close to the original as possible to make collectors feel like the originals. You can understand that the work belongs to the imitation market series, not the original, from our logo in the upper right part of the Nfts or the ⓘ sign in the name of the work. To avoid fake accounts, make sure you are in the real Imitation Market collection.

IMITATION MARKET

We offer Imitation Market NFTs at the lowest possible price. In this way, we enable collectors to develop their collections with low fees. You can also imitate NFTs that are not put up for sale or that are put up for sale at an exorbitant price, at low prices. With its low price, it appeals to a larger trader base than the original.

IMITATION MARKET

We cannot decide the price of NFTs based solely on the price of the original. Because some NFTs are not put up for sale or put up for sale at a very high price, it will not be a healthy pricing. According to the rarity and demand of the originals, we put them on sale at the lowest limit determined by taking into account many factors. We want it to reach its real value by trading by keeping the selling price as low as possible. While the actual value that our NFTs will reach will affect the price of the originals(base determines superstructure), the changes in the price of the originals and the followers and fans will determine the future value of our NFT that you will buy. After pricing our NFTs based on the original, if the price of the original changes, we will not change our own prices. However, if the price of the original has decreased, we will evaluate your price offers. In this way, we try to make the most suitable purchase for you.

IMITATION MARKET

We care about the reliability of our collection, name and logo. That's why we promise you that we will not interfere with any trades, and that we will keep our objective side without distinguishing between original collections. By completely eliminating ourselves and not compromising our policies regarding the future of our nfts, we are creating a completely natural free market.
